Subject: Re: SEP for MKC

Hi Eleanor,

Thanks for your email. At this point we are just looking for general ideas. I'm sure you heard from Jose that we spent quite a bit of time looking into die lube reduction and it is not a feasible project at this time. We would love to do something at our facility, as we know this relates to many community concerns, but are also considering community SEPs as well.

I will try to give you a call today during a break from my conference so we can touch base.

Thanks,

Alina

Hi Alina –

Sorry I missed your calls today.

Hopefully we can talk about SEPs tomorrow. But, if you give me a sense on what you're looking into, I could get a head start on pulling information together. Are you thinking of a community SEP? Something specific? Or just general ideas?

Let me know,

Eleanor
